

Tema 21

- Pisanje novinskih članaka, podesavanje svojstva
- Koristenje ikonica preko sajta fontawesome i preko googlea

Property	Description
<code>column-count</code>	Specifies the number of columns an element should be divided into
<code>column-fill</code>	Specifies how to fill columns
<code>column-gap</code>	Specifies the gap between the columns
<code>column-rule</code>	A shorthand property for setting all the <code>column-rule-*</code> properties
<code>column-rule-color</code>	Specifies the color of the rule between columns
<code>column-rule-style</code>	Specifies the style of the rule between columns
<code>column-rule-width</code>	Specifies the width of the rule between columns
<code>column-span</code>	Specifies how many columns an element should span across
<code>column-width</code>	Specifies a suggested, optimal width for the columns
<code>columns</code>	A shorthand property for setting <code>column-width</code> and <code>column-count</code>

PRIMER 1 - osnovna podesavanja za pisanje po kolonama

```
<!DOCTYPE html>
<html>
<head>
<style>
.newspaper {
  column-count: 3;
  column-width: 100px;
  column-rule: 1px solid lightblue;
  column-gap: 100px;
  padding: 20px;
  text-align: justify;
}
h1 {
  background-color: lightblue;
  text-align: center;
  padding: 15px;
}
h2, h3 {
  color: lightblue;
  margin-left: 20px;
}
}
```

```

</style>
</head>
<body>

<h1>ENGLISKI JEZIK U PROGRAMIRANJU</h1>
<h2>Ključne reči u programiranju</h2>
<div class="newspaper">
    ...neki tekst sa neta...
</div>

<h2>Okruženje u kome se programira</h2>
<div class="newspaper">
    ...neki tekst sa neta....
</div>

</body>
</html>

```

OBJASNJENJE ZADATKA:

NAPOMENA 1: Isprobati sa svim opcijama za navedene argumente, jedan po jedan, ne sve odjednom

PRIMER 2 - Ikonice

```

<!DOCTYPE html>
<html>
<head>
    <script src="https://kit.fontawesome.com/7a7c2d4a32.js"
crossorigin="anonymous"></script>
    <link rel="stylesheet"
href="https://fonts.googleapis.com/icon?family=Material+Icons">
</head>

```

```
<body>
  <h3>Ikonice sa sajta fontawesome</h3>
  <i class="fas fa-cloud" style="color: lightcoral;"></i><br>
  <i class="fas fa-heart" style="color: rgb(20, 206, 20); font-size:
50px;"></i><br>
  <i class="fas fa-car"></i><br>
  <i class="fas fa-file"></i><br>
  <i class="fas fa-bars"></i><br>
  <i class="fas fa-thumbs-up"></i><br>
  <h3>Google ikonice:</h3>
  <i class="material-icons">cloud</i><br>
  <i class="material-icons" style="color: lightcoral; font-size: 35px;"
>favorite</i><br>
  <i class="material-icons">attachment</i><br>
  <i class="material-icons">computer</i><br>
  <i class="material-icons">traffic</i><br>

</body>
</html>
```

OBJASNJENJE ZADATKA:

NAPOMENA 1: Isprobati prvo uvođenje samo jednih ikonica, ovih sa fontawesome sajta. Ako im ne bude radio, to je zbog onog js fajla, koji se pravi za svakoga posebno, mora da se napravi nalog, da bi oni poslali kod, koji predstavlja ime tog js fajla.

NAPOMENA 2: Lista ikonica tog sajta je ovde <https://fontawesome.com/v4.7.0/icons/>

NAPOMENA 3: Dovoljno je podesavati font size i boju da se napravi da bude dovoljno lepo

NAPOMENA 4: Dodati i ikonice preko google, lakse je

NAPOMENA 5: Lista google ikonica je ovdje: <https://materializecss.com/icons.html>

PRIMER 3 - PRIMENITI OVO NA SAJT!
